FAST

COMBINED CULTIVATOR-PREPARATOR

OTMA

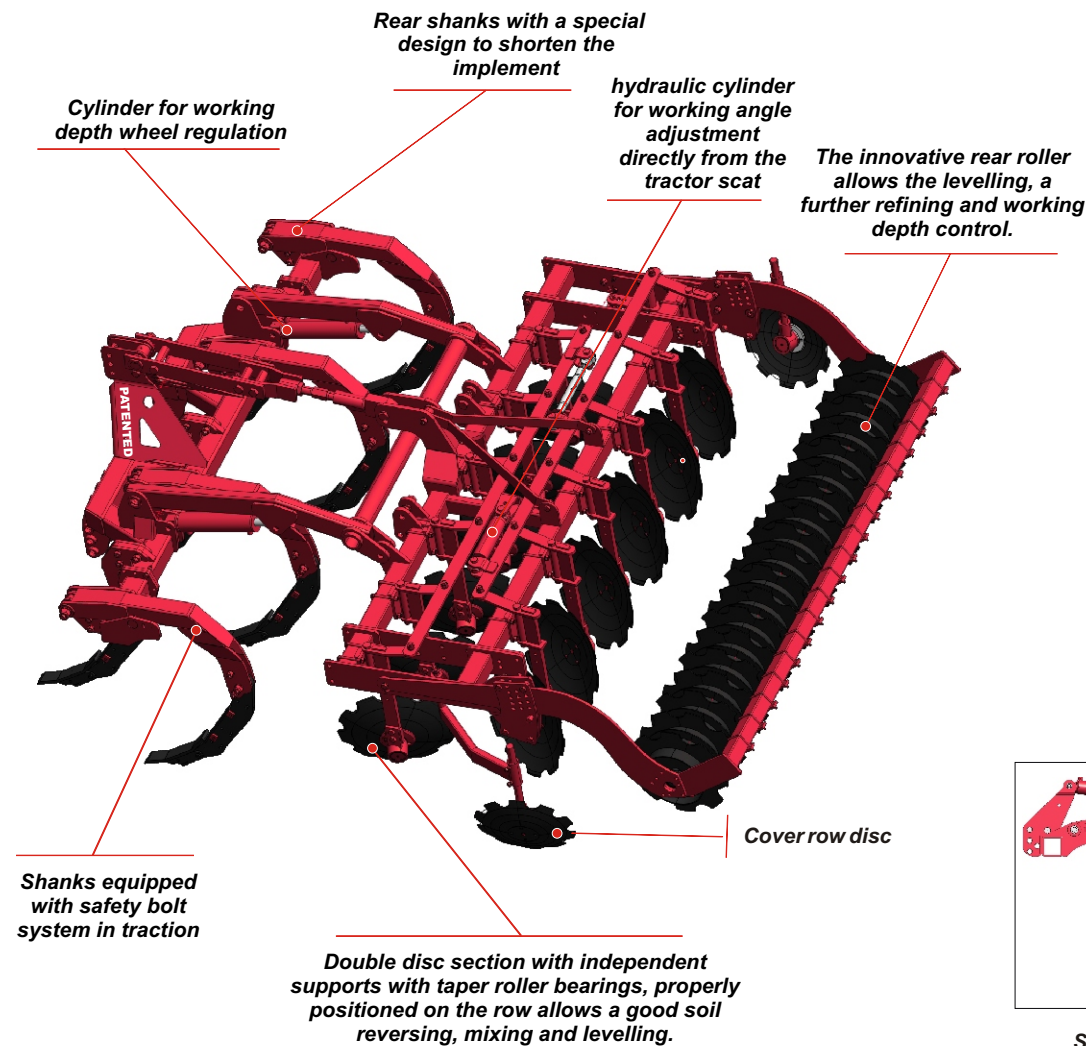

The cultivator-preparator **FAST**, result of a deep testing and researching work, is designed to reduce strongly the costs of soil working.

FAST allows a deep working and soil refining to prepare the seed-bed in one way, in almost all type of soil and at high speed. The discs section with independent support, properly positioned on the row to make short the machine, allows a good soil reversing, mixing and leveling, thanks to the particular position of the discs. The innovative rear roller allows the leveling action, a further refining and the control of the working depth.

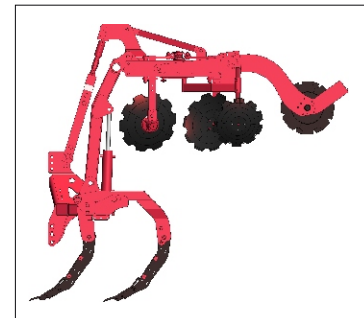

Main features of **FAST** type of work:

Scarifying up to 45 cm - aerating - reversing (without ploughing) - refining, mixing and leveling. The shanks are equipped with shear bolt in traction or hydropneumatic "NON STOP" safety system.

FAST has been designed to contain the weight and reduce the length, in order to drive in good stability.

Mod.F300+DS/RF

Short transport position to reduce the length

Scheme of the shanks with hydropneumatic "NON STOP" system

Mod.												
	Hp	Kw	N°	Cm	Cm	Cm	Cm	N°	Ø	Ø	Cm	Kg
Cultivator - preparator with shear bolt working in traction												
F 250+DSH/RF	160-180	118-132	5	250	250	80	20 - 45	10	610	---	---	1730 (650+680+400)
F 300+DSH/RF	180-220	132-162	7	300	300	80	20 - 45	12	610	---	---	2270 (985+830+455)
Coltivator - preparator with hydraulic "NON STOP" safety system												
F SI 250+DSH/RF	160-180	118-132	5	250	250	80	20 - 45	10	610	---	---	1980 (900+680+400)
F SI 300+DSH/RF	180-220	132-162	7	300	300	80	20 - 45	12	610	---	---	2550 (1265+850+455)
